

On Shipboard.

Dear Cousin Charley:

I am writing this on the ship, way out in the ocean—we can't see land, anywhere—nothing but great, big waves. We have been out of sight of land for three days. Mrs. Dean and mama have both been a little sick, as the ocean was pretty rough when we started, but they are all right now.

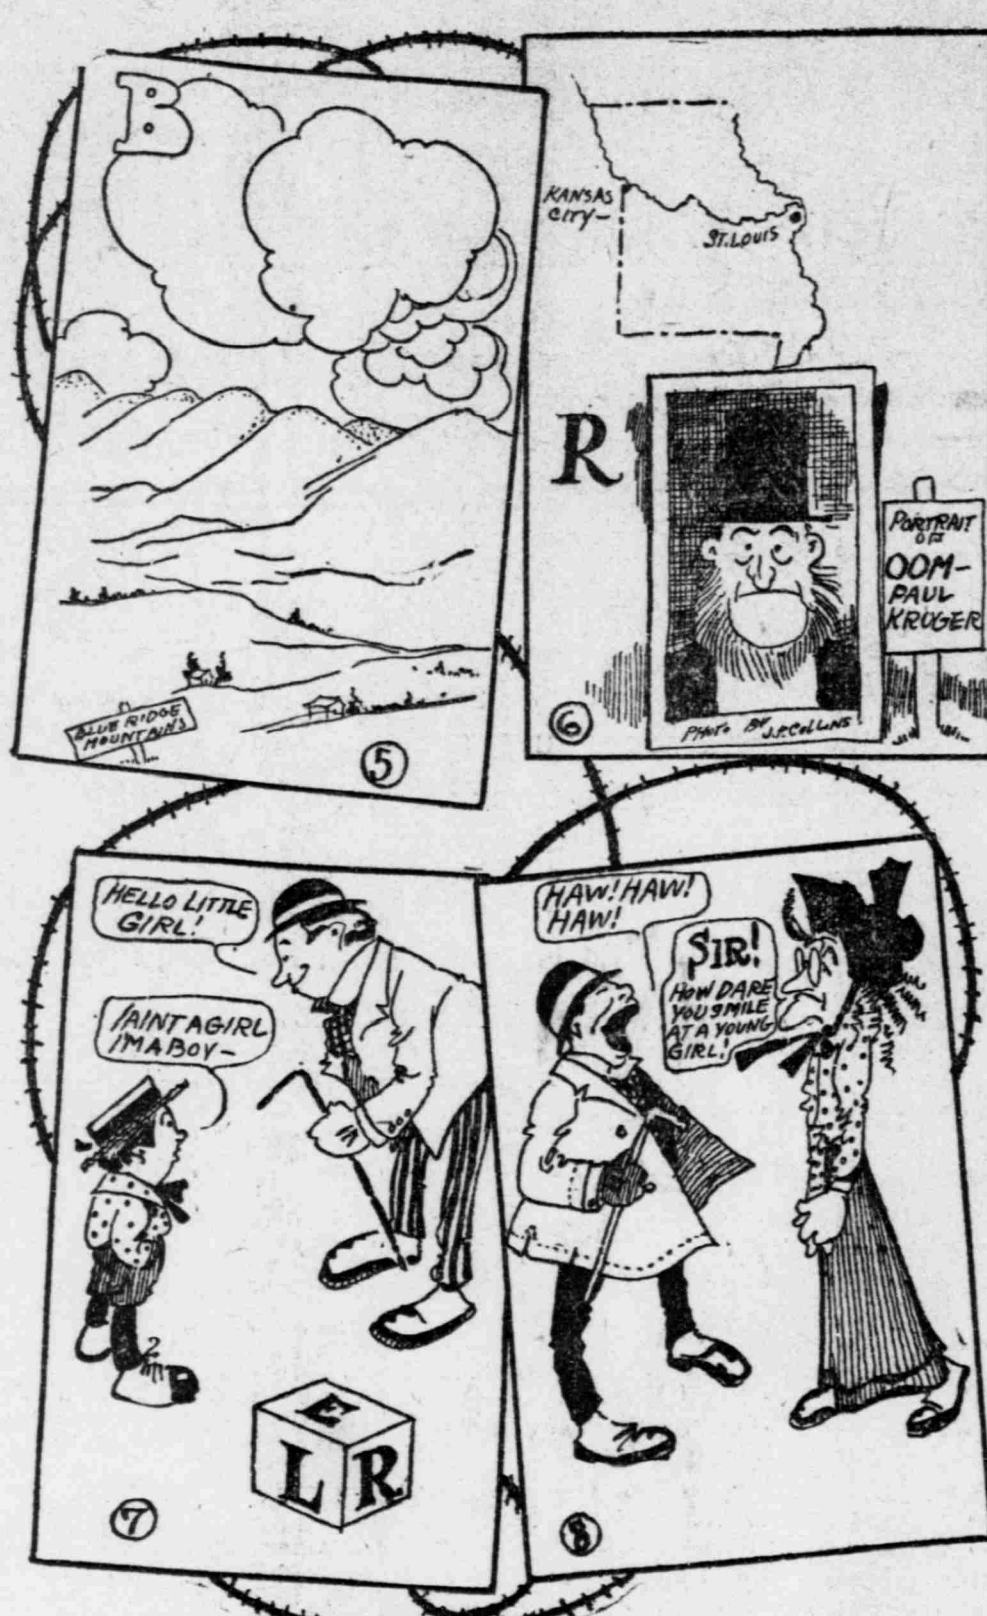

The ship is just like a big hotel, and the decks like big porches. We play games on them. I like shuffle-board the best. You play that with little round wooden blocks that are shoved along the deck with long sticks.

You haven't any idea how big one of these ships is unless you are on it. The one we are on is eight stories high, five above the water and three under, the engine and boilers are all under the water and the men who work down there hardly see daylight from the time they leave New York until they reach Liverpool.

Poor old Spots has to stay down in the baggage-room where all the pet animals are kept. He has lots of company, though. The monkeys, cats, parrots, pugs, French poodles and canaries that belong to the other passengers. You know things get awfully slow on the boat, so the other day Dorothy and I slipped down there, and just to stir up a little excitement, we turned all the pets loose, untied the dogs and monkeys, and let the parrots and cats out of their cages and boxes. They were all so surprised at first that they didn't know what to do, and it gave us time to reach another part of the boat. But pretty soon we heard them; it sounded like a menagerie all turned loose at once. Spots took out after a cat, and around the room they tore. Two bill terriers who had been cussing each other all the trip got mixed up in one corner, and two old tomcats made fur fly in another. One of the monkeys got hold of a parrot's tail feathers, and, well, you never heard such a racket. People came running from every direction, and of course we were as innocent as any of them. Well, when they got them separated they found that the parrot had bit the end of the monkey's tail off and the monkey had a hand full of the parrot's tail feathers and one of the tomcats had lost about two square inches of fur. Of course, we didn't know anything about it, but I think several people unjustly suspected us.

We will be in London next week and will write you from there.

Your Cousin,
HARRY LAFAY.

Puzzle Army Makes a Remarkable Charge on New York City.

FIRST PRIZE GOES TO HELEN MORGAN AND SECOND TO ETHEL GILMORE—ARMY WAS OUT IN FULL FORCE LAST WEEK.

The lucky coupons drawn this week were: Helen Morgan, city, first prize, The Journal's dollar; and Ethel Gilmore the D'Alemberte prize box of Huyler's candy.

The puzzle army made a great record on last week's puzzles. Out of nearly three hundred answers only four were wrong.

Now that is something of a victory, to be sure. There will have to be

some new puzzle invented if The Journal's puzzles are to be mystified. There were four or five correct answers sent in that were written on pieces of writing paper instead of the puzzle coupon. All were from new recruits to the army, who will understand next time that the answers must be written on The Journal's puzzle coupon, bearing the date at the top.

"Hurry Harry" is doing a little harder "stunt" this week than last, for who does not know something about New York City? Still everyone does not know the parts of an ocean-going steamer. When you think of it, though, this puzzle is going to be easy for the puzzle army as there is probably not even a little tot among them who has not been on board a steamer in our big bay.

But children, do not always wait for easy puzzles. Remember that the harder the puzzle, the fewer are the answers and you will stand a better show for the prizes.

The correct answers to last week's puzzles are as follows:

FOR the particular young man prejudiced against anything showy or exaggerated in dress and still desiring a garment which is stylish, up-to-the-minute—this suit, the SAXON, has many desirable features. Genuine and simple in line, disclosing the work of clothing craftsmen, it strongly conveys the impression of quiet quality and dignity. Made by The House of Kuppenheimer—a worthy example of their pre-eminence as makers of men's fine clothing.
